

RHINO PLY

Rhino Ply is a long lasting and durable plywood that is bonded with EO glue.

The bonded surface of Rhino Ply is made from sheets of high pressure laminate, which are hard wearing, moisture resistant, stain resistant and easy to clean. Cabinetry such as kitchen, laundry, wardrobe and vanity carcasses made from Rhino Ply, are incredibly durable, rigid and strong.

Rhino Ply White & Black

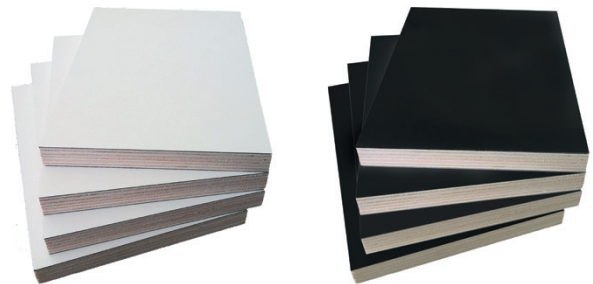

FEATURES & BENEFITS

Benefits: Rhino Ply is a 9 ply construction, providing superior stability and durability. Kitchens will continue to hold their shape and will look great for years to come. The high pressure laminated surface is hard wearing and easily cleaned.

Uses: Superior carcass construction. Use in areas where moisture is present such as kitchens, vanities & laundry units.

Limitations: Plywood is harder wearing on tooling compared to other substrate materials such as MDF and particleboard. The plywood is not designed for exterior use.

Rhino Ply is produced "Run of the Mill" and most plywood substrates show see through. We do not recommend Rhino Ply to be used as face material or where the aesthetic appearance of the panel is critical.

- White Rhino 120105: Plywood laminated both sides with 0.8mm texture finish high pressure laminate
- Black Rhino 120107: Plywood laminated both sides with 1.0mm texture finish high pressure laminate
- Plywood Species: Poplar
- Black includes protective film on both sides
- 2440MM X 1220MM
- Overall Thickness: White 16mm. Tolerance +/- 0.5mm Black: 17mm Tolerance +/- 1.0mm
- Source: FSC Certified plywood factory based in China
- Glue: EO glue bonds the plywood

DESCRIPTION	CODE
2440MM X 1220MM X 16MM WHITE TEXTURE	120105
2440MM X 1220MM X 17MM BLACK TEXTURE	120107

Note: To increase moisture resistance, all sides of the panel must be edged.
