

Rangehood Ventilation

Easy and effective venting solutions

This new range of rangehood vent kits makes venting out a rangehood even faster and easier. All kits include 3 metres of expandable aluminium semi rigid duct. Roof kits include a contemporary designed aluminium cowl vent for maximum protection and 600mm galvanised steel pipe for easy and safe installation. A bracing strap allows for easy attachment of the pipe to the roofing structure. Ceiling/wall ring ensures draft and dust free holes in plaster. A full range of accessories is also available.

Wall/Eave Kits - 125mm and 150mm

- Gravity vent (for wall)
- Eave vent (for eave)
- 3m semi-rigid duct
- Ceiling/wall ring
- Steel worm clamp x 2
